

Lympstone Tennis Club match selection principles

The points below are a set of principles that the club follows for match selection.

- All match players are encouraged to be active members of the club to help with selection.
- A teams are focused on fielding the strongest pairings for matches.
- B teams are focused on competitive tennis and using a wider pool of players.
- If demand for matches outstrips supply then the committee would encourage members to volunteer to setup and captain additional teams.
- Captains are approved by the committee and volunteer their time.
- Captains should be empowered to make their own selection choices drawing on match results, successful pairings, club tennis performance and other relevant data.
- Captains should discuss their selection with the mixed, women's and men's captains.
- Captains should be transparent around their selection approach so potential players can decide if they wish to be considered for selection.
